# Sandra Krle

A **FRONT-END DEVELOPER** with more than **5 years** of work experience. Proficient user of **JavaScript, TypeScript** and modern JS libraries **React, Vue** and **Angular**. Expert knowledge of **web accessibility.** Developing web features that are visually beautiful, technically performant and accessible. Passionate about writing tests, bug hunting, ensuring responsiveness and improving the performance of applications. A constant learner, focused coder and a valued team member. Looking for challenges to take my career to the next level.
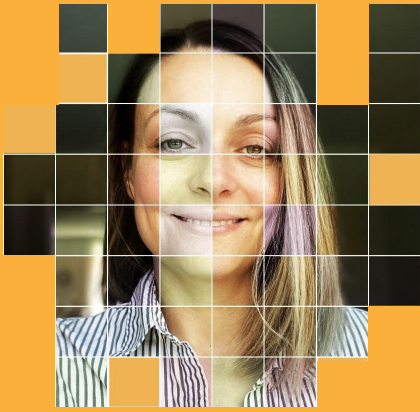

🏠 Stockholm, Sweden

Coursera, Codecademy, FreeCodeCamp, Udemy

## EXPERIENCE

2022 MARCH – 2023 MARCH
### Accessibility specialist / Frontend developer @ soundtrap.com (prev. Spotify)
Industry: Music
Client: Soundtrap/Spotify
Product:  Web audio workstation for creation of music and podcasts
Tech: **Angular, React (Next.js)**
Contribution:
- ❑ Rewrite existing Angular and React code to conform with web accessibility standards (WCAG 2.1 & 2.2)
- ❑ Performed accessibility analysis to identify potential accessibility violations using screen readers and other accessibility testing tools
- ❑ Worked on refactoring and adding new features on Soundtraps checkout process, including e2e and unit tests for both the Angular and React code base.

2020 AUGUST – 2022 FEBRUARY
### Frontend developer @ jayway.com
Industry: Consulting
Client: Bombardier Transportation Sweden AB
Product:  Web application for prediction of failures on train tracks
Tech: **Vue.js + Vuex**
Contribution:
- ❑ Created page templates, menus, tables, image cards, dropdowns, modals, forms and many other web elements
- ❑ Implemented login/signin flow using Auth0
- ❑ Discussed technical implementation of the design with the client/UI designer/backend and creating mockups of the possible solutions
- ❑ Mentoring junior web developers, driver of an internal web community

2017 MARCH – 2020 AUGUST
### Frontend developer @ svenskaspel.se
Industry: Sports & Gambling
Product:  CMS web application
Stack: **React.js + Redux**
Contribution:
- ❑ Created page templates, forms, menus, tables, dropdowns, modals and many other web elements
- ❑ Rewriting legacy code from Backbone to React
- ❑ Writing unit tests, functional (UI) and integration (API) tests
